

# Main Page

---

The Mainpage has three options namely Demo, Fire Safety tips, and phone. It also gives an admin option which is strictly limited to Firefighters.

---

[Demo](#)

---

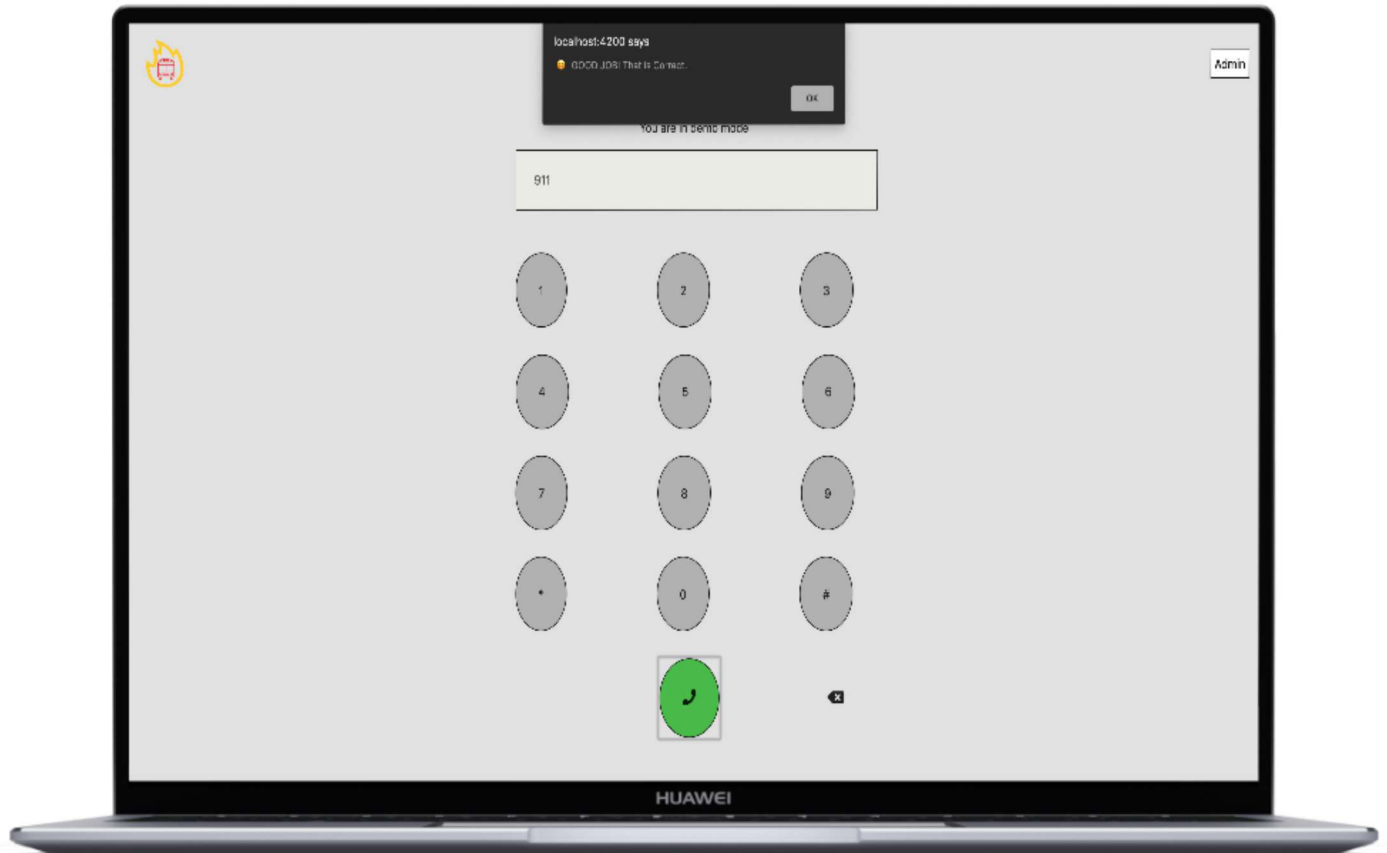

# Demo

---

The demo option gives you a walkthrough to make a successful call. After three consecutive unsuccessful trials, it will automatically display numbers in order to make a call successfully.

*The above image depicts the visual representation of hints on the Web App to call 911.*

*The above image depicts the visual representation of a successful call with a message saying “Good Job” on the Web App to call 911.*

You have to click the Logo on the Top-left of the screen in order to navigate yourself back to the Mainpage.

---

[Main Page](#)[Fire Safety Tips](#)

---

# Fire Safety Tips

---

The Fire Safety Tips option includes FAQ's and some basic precautions that need to be taken.

*The above image is a visual representation of Fire Safety tips on the Web App.*

You have to click the Logo on the Top-left of the screen in order to navigate yourself back to the Mainpage.

---

[Demo](#)[Phone](#)

---

# Phone

---

The phone option gives you an array of numbers from 0 to 9 to dial emergency number 911. The representation is basic and represents a basic keypad of a cell phone and displays a different kind of messages such as call in progress, call successful and call unsuccessful. After three consecutive attempts of failure to dialling the correct number, It will start to give user hints by changing the correct numbers on the keypad to green colour.

The above image shows a call in progress and in order to end the call you have to press the red button.

The above image shows hints to make a successful call.

[Fire Safety Tips](#)

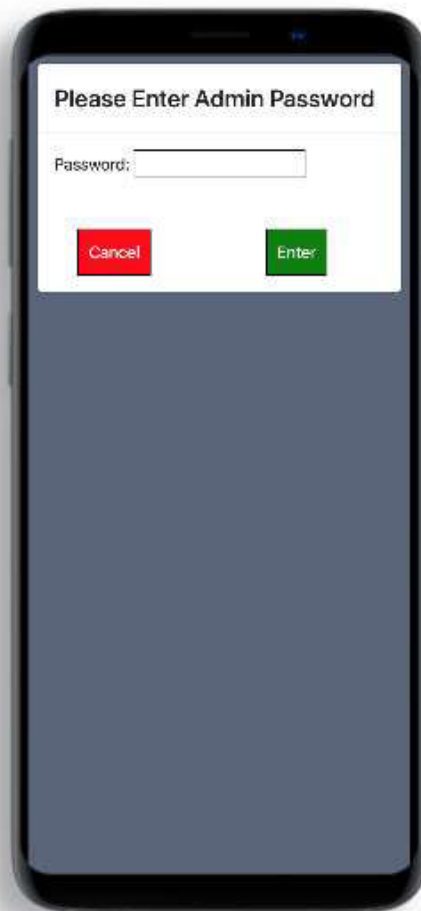

[Admin](#)

---

# Admin

---

The Admin option is strictly limited to firefighters. The admin prompts the firefighter to enter their personal credentials in order to receive the calls made to 911 using the Web App.

*The above image is a visual mockup of the Admin option asking the firefighter to enter their personal credentials.*

*The above image is where the firefighter has to enter 11-digit phone number. For eg: 12345678912*
